

Your customers demand results... We deliver them. There is one factor that always exists in every successful project, and we know what it is: It's the People.

About Us

JEFFERSON is 30 year-old Information Technology Solutions and Services company. The corporation provides a variety of both project staffing capabilities and business solutions services. JEFFERSON is a certified, 100% owned and operated minority business enterprise and historically underutilized business (HUB). We focus on improving the People, Processes and Technology that support your business.

About Applications

Software availability is critical for your management and IT decision-makers. It's a constant effort for your in-house service team to maintain the accessibility of your high-demand systems. The goal is to maximize the availability of your application software enabling you to spend more time responding to your business user's requirements. We have experience providing solutions in the following areas:

- Software Selection
- Software Installation / Upgrades
- Data Conversion
- Application Testing
- Interfaces / Data Exchange
- Training and Documentation
- Report Writing

Our Approach

JEFFERSON works with clients to identify and realize potential to increase their return on investment and enhance their relationships with customers. As a solutions provider, it is our obligation to identify opportunities for cost savings and suggest alternatives to the client, especially when these options will have minimal impact on project goals and timelines. Jefferson has proven success as a systems integrator for large, complex projects because of our ability to manage and deliver solutions to our clients on time and within budget.

Whether you are rolling out new applications for your organization or developing an interface to your legacy system, why not call the company that has the experienced people?
