

Your customers demand results... We deliver them. There is one factor that always exists in every successful project, and we know what it is: It's the People.

## About

## Us

JEFFERSON is 30 year-old Information Technology Solutions and Services company. The corporation provides a variety of both project staffing capabilities and business solutions services. JEFFERSON is a certified, 100% owned and operated minority business enterprise and historically underutilized business (HUB). We focus on improving the People, Processes and Technology that support your business.

## About

## Consulting

We strive to understand the customer's business environment, organizational goals and operational constraints before beginning any engagement. By assembling the right team and then managing to the requirements of the project, Jefferson's methodologies are proven successful year after year. We have experience providing solutions in the following areas:

- Advisory and Strategy
- Project Management
- Systems Analysis
- Internal Audit
- Business Process Analysis
- Proposal Development
- Business Case Development

## Our

## Approach

JEFFERSON works with clients to identify and realize potential to increase their return on investment and enhance their relationships with customers. As a solutions provider, it is our obligation to identify opportunities for cost savings and suggest alternatives to the client, especially when these options will have minimal impact on project goals and timelines. Jefferson has proven success as a systems integrator for large, complex projects because of our ability to manage and deliver solutions to our clients on time and within budget.

Whether you need a five-year plan for your organization or documentation of your existing systems and business processes, why not call the company that has the experienced people?
